

Berkey Light® XRP & VPP Plug Changes

New Millennium Concepts, Ltd has made a change in the plugs utilized in the **Berkey Light®** systems. We have slightly enlarged the element holes in the upper chamber of the **Berkey Light®** system. Accordingly, we have also slightly increased the diameter of the blocking plugs.

The new larger size XRP Plug will fit into all **Berkey Light®** systems with a production year of 2014 or later. All **Berkey Light®** systems with a production year of 2013 or earlier will require the smaller XRP plugs. The manufacturing date on the system can be found on the embossing on the bottom of the upper chamber. Look for a circle with a two-digit number in it. If the number in the middle of the circle is 14 or larger, then the larger XRP plugs are needed. If the number in the circle is 13 or lower, then the smaller XRP plugs will be needed. Please make sure the manufacturing date is verified before shipping replacement XRP plugs to your customers.

Our long-term plan over the next year is to also replace our VPP Plugs with the new XRP plugs. Having a universal plug for all our **Berkey®** systems will serve to simplify and reduce the number of inventory parts needed by dealers.

The SKU's for each size plug are:

XRP-SM – For all **Berkey Light®** systems manufactured in 2013 or earlier.

XRP-LG – For all **Berkey Light®** systems manufactured in 2014 or later and all **Berkey®** stainless steel systems.

If you have any questions, please feel free to contact your Account Representative.

2013 or Earlier
Use XRP-SM

2014 or Later
Use XRP-LG
